

INŽENJERSKA KOMORA CRNE GORE
ENGINEERS CHAMBER OF MONTENEGRO
PROFESSIONAL CHAMBER OF MECHANICAL ENGINEERS

ORGANIZE

2nd International Conference Heating, Ventilation, Air Conditioning and Refrigeration
Budva, Hotel Slovenska Plaža, 22.-23. septembar 2016. godine

energija+

Engineers Chamber of Montenegro as an association of persons engaged in activities of spatial planning and construction of facilities within their jurisdiction, and the protection of public interest and the promotion and education of the members of the Chamber, which is the professional chamber of mechanical engineers motivated us for the organization of this Conference.

Conference will be organized as an opportunity for the gathering and exchange of knowledge, experiences and opinions of all those in the technique of air-conditioning, heating and cooling systems professionally engaged in or connected to this field, such as academics, researchers, designers, students, contractors and service technicians in the field of air conditioning, heating and cooling, consultants and investors, representatives of manufacturers and retailers of equipment for air conditioning, heating and refrigeration, government representatives from the field of building construction and environmental protection in Montenegro and abroad.

The objectives of this conference are:

- providing expertise of the members of the Chamber in order to progress and popularization of engineering activities in Montenegro;
- establishing cooperation with similar professional organizations abroad;
- cooperation with professional organizations and state institutions in the development and adoption of regulations concerning the field of air conditioning, heating and cooling;
- preserving the environment and reduce the impact on global climate change;
- increasing energy efficiency, rational consumption and energy saving;
- monitoring the development of techniques and technologies;

The Conference will focus on the following topics:

- examples of good practice, ie. representations of some of the most interesting projects in the field of air conditioning technology, heating and cooling;
- new solutions and innovations in refrigeration, ventilation and air conditioning;
- energy efficiency and climate systems, heating and cooling, reducing emissions of carbon dioxide as combustion products fossil fuel;
- design and construction of cooling, ventilation and air conditioning;
- market, professional education, standards, norms and regulations in the field of air conditioning, heating, refrigeration and cooling;
- devices and equipment for air conditioning, heating and cooling;
- thermal insulation, noise and fire related to climate systems for heating and cooling;
- the use of working substances in the field of cooling (freon).

You are invited to join us and please let us confirm your attendance by e-mail: vuk.novaenergija@gmail.com. **NOTE: There are no Conference fee for the participants.**

Your presence would have done us a great honor and pleasure.
