Pismo poziva

Veliko mi je zadovoljstvo pozvati vas, u ime Udruženja inženjera konsultanata Bosne i Hercegovine na Konferenciju o upravljanju cestovnom infrastrukturom sa aspekta bezbjednosti, koji se održava u Sarajevu 15 i 16 aprila 2010 godine.

Svi znamo koliko veliku ulogu igra transport u ekonomiji i društvu. Generalni cilj transporta bio je i biće zadovoljavanje potreba stanovnika i privrede na racionalan i bezbjedan način.

Istovremeno transport uzrokuje enorman broj nesreća. Najveći broj nesreća dešava se na cestovnoj infrastrukturi.

Na našoj planeti stalno se povećava broj stanovnika, broj vozila, broj putovanja, a što utiče na povećanje poginulih i unesrećenih na cestama.

U Bijeloj knjizi iz 2001 godine Evropska Komisija je zadala cilj da se u EU u periodu od 2001 do 2010. prepolovi broj poginulih u saobraćajnim nesrećama na cestama u Evropskoj Uniji.

Juna 2003 godine Evropska komisija je definirala cestovnu infrastrukturu kao treći stub politike bezbjednosti cestovnog transporta koji bi trebao doprinijeti ostvarivanju ciljeva EU u pogledu smanjenja broja nesreća.

Zato su Evropski parlament i Vijeće Evropske unije usvojili u novembru 2008 godine Direktivu 2008/96 o bezbjednosti cestovne infrastrukture.

U preambuli direktive naznačeno je:

„Da bi se povećao nivo bezbjednosti na cestovnoj infrastrukturi unutar transevropske cestovne mreže od velikog je značaja uspostavljanje odgovarajućih postupaka. Na strateškom bi nivou ocjene bezbjednosti cestovnog saobraćaja trebale ukazati na bezbjednosni aspekt različitih varijantnih rješenja nekog infrastrukturnog projekta, te bi takve ocjene trebale odigrati značajnu ulogu pri odabiru trase buduće ceste.

Rezultati ocjena bezbjednosti cestovnog saobraćaja mogu se iskazati u mnogim dokumentima. Pored toga, kontrolom bezbjednosti saobraćajnica mogu se detaljno utvrditi nesigurni elementi projekata cestovne infrastrukture. Stoga bi bilo dobro razviti postupke koji bi se primjenjivali u ta dva područja, da bi se tako povećala bezbjednost cestovne infrastrukture unutar transevropske cestovne mreže, što ipak ne uključuje cestovne tunele koji su pokriveni Direktivom evropskog parlamenta i Vijeća br. 2004/54/EC o minimalnim sigurnosnim uvjetima za tunele unutar transevropske cestovne mreže, objavljenom 29. aprila 2004 godine“.

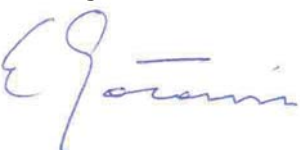

U okviru Konferencije ERF (European Road Federation) predstavice slijedeće teme:

1. Politika upravljanja bezbjednosti na cestama: Program djelovanja 2011 2020
2. Ispitivanje bezbjednosti na cestama
3. Sigurnost cestovne infrastrukture EN-1317
4. Upravljanje crnim tačkama
5. Saobraćajni znakovi

Na Konferenciji svoje radove će prezentirati eksperti iz 10 evropskih zemalja.

Ova Konferencija je prilika za eksperte iz različitih institucija uključenih u rješavanje problema upravljanja cestovnom infrastrukturom sa aspekta bezbjednosti saobraćaja da prezentiraju svoje rezultate, nauče više od drugih i svi zajedno postanu bogatiji u znanju neophodnom u podizanju nivoa bezbjednosti na cestama.

The Invitation Letter

It gives me a great pleasure to invite you, on behalf of the Association of Consulting Engineers of Bosnia Herzegovina, to the Conference on the management of road infrastructure from the safety viewpoint, which will be held in Sarajevo on 15th and 16th April 2010.

We all know how great a role transport has in the economy and society. The general aim of transport was and will be to meet the needs of the population and economy in a rational and safe manner.

At the same time, transport causes an enormous number of accidents. The most of accidents happen on the road infrastructure.

Population, the number of vehicles and trips have constantly been increasing on our planet, and this has the impact on increased number of deaths and injuries on roads.

White Paper from 2001 set the target for reducing the number of deaths by half on the roads within the European Union between 2001 and 2010.

In June 2003, European Commission defined the road infrastructure as the third pillar of policies in road safety that should contribute to the achieving of EU objectives in terms of reducing the number of accidents.

Therefore, the European Parliament and the Council of the European Union adopted the DIRECTIVE 2008/96/EC from 19th November 2008 on road infrastructure safety management.

The preamble of the Directive pointed:

"The setting up of appropriate procedures is an essential tool for improving the safety of road infrastructure within the trans-European road network. Road safety impact assessments should demonstrate, on a strategic level, the implications on road safety of different planning alternatives of an infrastructure project and they should play an important role when routes are being selected. The results of road safety impact assessments may be set out in a number of documents. Moreover, road safety audits should identify, in a detailed way, unsafe features of a road infrastructure project. It therefore makes sense to develop procedures to be followed in those two fields with the aim of increasing safety of road infrastructures on the trans-European road network, whilst at the same time excluding road tunnels which are covered by Directive 2004/54/EC of the European Parliament and of the Council of 29 April 2004 on minimum safety requirements for tunnels in the trans-European road network."

The Conference of ERF (European Road Federation) will present the following topics:

1. Road Safety Management Policies: EC Road Safety Action Programme 2011- 2020
2. Road Safety Audits
3. Road Safety Infrastructure EN-1317
4. Black Spot Management
5. Road Signs

Experts from 10 European countries will present their papers at the Conference. This conference is an opportunity for experts from different institutions, involved in resolving the problems of road infrastructure management from the aspect of traffic safety, to present their results, learn more from others and together become richer in knowledge, necessary to raise the level of road safety.

Ciljevi / Objectives

Cilj Konferencije o upravljanju cestovnom infrastrukturom sa aspekta bezbjednosti je da:

- ♦ omogućiti kvalitetnu razmjenu znanja i iskustava o implementaciji Direktive 2008/96 u svim njenim aspektima,
- ♦ potpomogne implementaciju Direktive
- ♦ ukaže na moguće pristupe u primjeni Direktive kao i na poteškoće u primjeni direktive.

Na konferenciji će se tretirati:

- ♦ ocjena uticaja cestovne infrastrukture na bezbjednost saobraćaja
- ♦ revizija cestovne sigurnosti na infrastrukturnim projektima
- ♦ upravljanje postojećom cestovnom infrastrukturom sa aspekta bezbjednosti.

Tretiraće se ceste koje se tek planiraju, projektiraju ili grade kao i one koje su u upotrebi.

The main objectives of the Conference on the management of road infrastructure safety are:

- ♦ to allow quality knowledge and experiences exchange regarding Directive 2008/96 in all of its aspects,
- ♦ to encourage implementation of the Directive in the South-East Europe countries,
- ♦ to point out on the possible actions in the Directive application and on difficulties in the Directive application.

The following subjects will be considered on the Conference:

- ♦ assessment of road infrastructure impact on road safety
- ♦ road safety audit in infrastructure projects
- ♦ existing road infrastructure safety management

The roads in stage of planning, designing or under construction, as well as roads in use will

Hotel Europe, established in year 1882 on crossroads of Oriental and European Sarajevo, is inspired with best attributes of both worlds. Positioned in the heart of the city, just a few steps from touristic epicenter old town, this Austro-Hungarian building impounds with its look alone.

With the famous Viennese Café, local and international cuisine top specialties in our restaurant, and original sweets in Mozart patisserie, Hotel Europe will invigorate your soul and make your stay in Sarajevo a journey you will always remember with smile.

Sarajevo is situated in the area of Sarajevo plain, which is surrounded by mountains Bjelasnica and Igman from the Southwest, by Trebevic from the Southeast, middle-range mountains and inter valley headlands (capes) on the North and Northwest. The city of Sarajevo in the area of 141,5 km², in four municipalities (Old City, Center, New City and New Sarajevo) has 297,416 residents.

For over four hundred years, mosques, synagogues, Orthodox and Roman Catholic churches have been built and have stood side by side here.

Citizens of different nationalities and religious orientations live and work together, developing their city and their own style of togetherness regardless of conquerors and foreign rulers whose identity changed over and over again, fast or slowly, depending on the historical and geopolitical situations and the great-power interests.

When we, Sarajevo people, are asked what we like so much about Sarajevo, we respond that Sarajevo is cultural and scientific treasury of the Balkan. When they dispute that, we offer the truth...

Even in the XVI century Sarajevo was the most important commercial center in the Balkan...

1461. the first water supply was built here...

Only 13 years after the first power plant was built in New York, our streets got electrical lighting...

We had first high educational institution already in 1537...

The first rail horse-drawn tram in Austria - Hungarian monarchy was replaced with, at the time being, the first electrical tram in Balkan and middle Europe...

To Sarajevo and its First Gymnasium two sole ex Yugoslav Nobel winners Vladimir Prelog and Ivo Andric owe their knowledge upon which they won Nobel prizes for chemistry and literature....

Sarajevo is the keeper of Hagada, one of the most valuable Jewish books in the world....

Our innovators again and again astound the world's public by a large number of revolutionary new inovatory solutions...

In 1984. Sarajevo was the host of XIV Winter Olympic Games...

Music we compose is often heard on MTV or in a Hollywood....

We started the 21. century with exceptional achievemnt of Danis Tanovic the winner of the world's greatest movie recognition Oscar, the only winner from this region, for the best foreign language movie...

And only then, when you experience your first noon in Sarajevo, you realise the meaning of of words that noon sounds so beautiful only in Sarajevo...
